D. Purpose of Use – Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation 7.5 acres; Stockwatering _____; Domestic _____;

Other (specify) _____

E. Changes in Method of Diversion – Describe any changes in your project since your previous statement was filed.
 (New pump, enlarged diversion dam, location of diversion, etc.)

F. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Are you now employing water conservation efforts? YES
 Describe any water conservation efforts you have initiated: _____

NO

b. If you are claiming credit for water conservation under section 1011 of the Water Code for your claimed pre-1914 appropriative right, please show the amount of water conserved:

Reduction in Diversions:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

Reduction in consumptive use:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to conservation efforts. YES NO

5/11/05

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Division and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Statements of Water Division and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation, and (3) assists the State to determine if additional water is available for future appropriators.

There is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. An appropriate right is required for use of water on non-riparian land and for storage of water. Generally, appropriate rights may be exercised only when

appropriate rights can be granted to waters "foreign" to the natural stream system.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been served from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water which originates in a different watershed, water previously stored by others, return of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

There are two principal types of surface water rights in California. They are riparian and appropriate rights.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statement of Water Diversions and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water appropriation for future appropriators. (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional upsteam concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

DIVERSION

WITHIN: 1/4 OF 1/4 SECTION 23, T02S, R16E, MDB&M.

INSTRUCTIONS: Please complete Items A, B and C. Item D should be completed if you replaced all or part of your regular water supply with reclaimed or polluted water. RETURN THIS FORM BY JULY 1, 1990. (Additional information on reverse side of this form.)

- A. Amount of Use - Fill in the amount of water used each month. If monthly and annual use are not known, check the months in which water was used. Amounts below are: Gallons Acre-feet _____ (other)

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1987													
1988													
1989													

- B. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation X

Stockwatering T

Domestic O

Other (specify) P

- C. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

- D. If part of the water listed in Part A consists of reclaimed or polluted water, please indicate the annual amounts of reclaimed or polluted water in the space below.

I declare under penalty of perjury that the information in this report is true to the best of my knowledge and belief.

DATED: Dec 26th, 1989, at COULTERVILLE, California

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- “Statement of Water Division and Use”
- “Information Pertaining to Water Rights in California”
- “Water Rights for Stockponds Constructed Prior to 1969”
- “Appropriation of Water in California”

STATEMENT OF WATER DIVERSION AND USE

S 101

This statement should be typewritten or legibly written in ink.

- A. Name of person diverting water Richard Cuneo Fox & James Lowell Munn
Address 127 Humboldt St. San Rafael, Calif. 94901
- B. Name of body of water at point of diversion Mt. Tamalpais Creek
Tributary to Cuneo Creek via Maxwell Creek then Larkspur River
- C. Place of diversion Mt. Tamalpais % Section 23, Township 25, Range 16 E., B.M.
County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.
- D. Name of works Ditch

E. Capacity of diversion works 200 gallons/minute

Capacity of storage reservoir

State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total	Annual
	: 4	: 4	: 2	: 2	: 1	:	:	:	:	:	:	:	3	16 acre-feet

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc.

Maximum ann. water use in recent years 25 acre-feet

Minimum annual water use in recent years 10 acre-feet

Type of diversion facility: gravity pump

Method of measurement: weir flume, electric power meter, water meter, estimate

F. Purpose of use (what water is being used for) Help replenish aquifer
for summer use.

G. General description or location of place of use (use sketch of section grid on reverse side if you desire)
See map

H. Year of first use as nearly as known 1880

I. Name of person filing statement Richard Cuneo Fox

Position Half-Owner

Organization

Address 127 Humboldt St. San Rafael, Calif

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.

Date signed Dec 26th 1964

Signature Richard Fox
